

ITEC634 LAB ASSIGNMENT

Name – Emmanuel Orunta

Student ID – S00403657

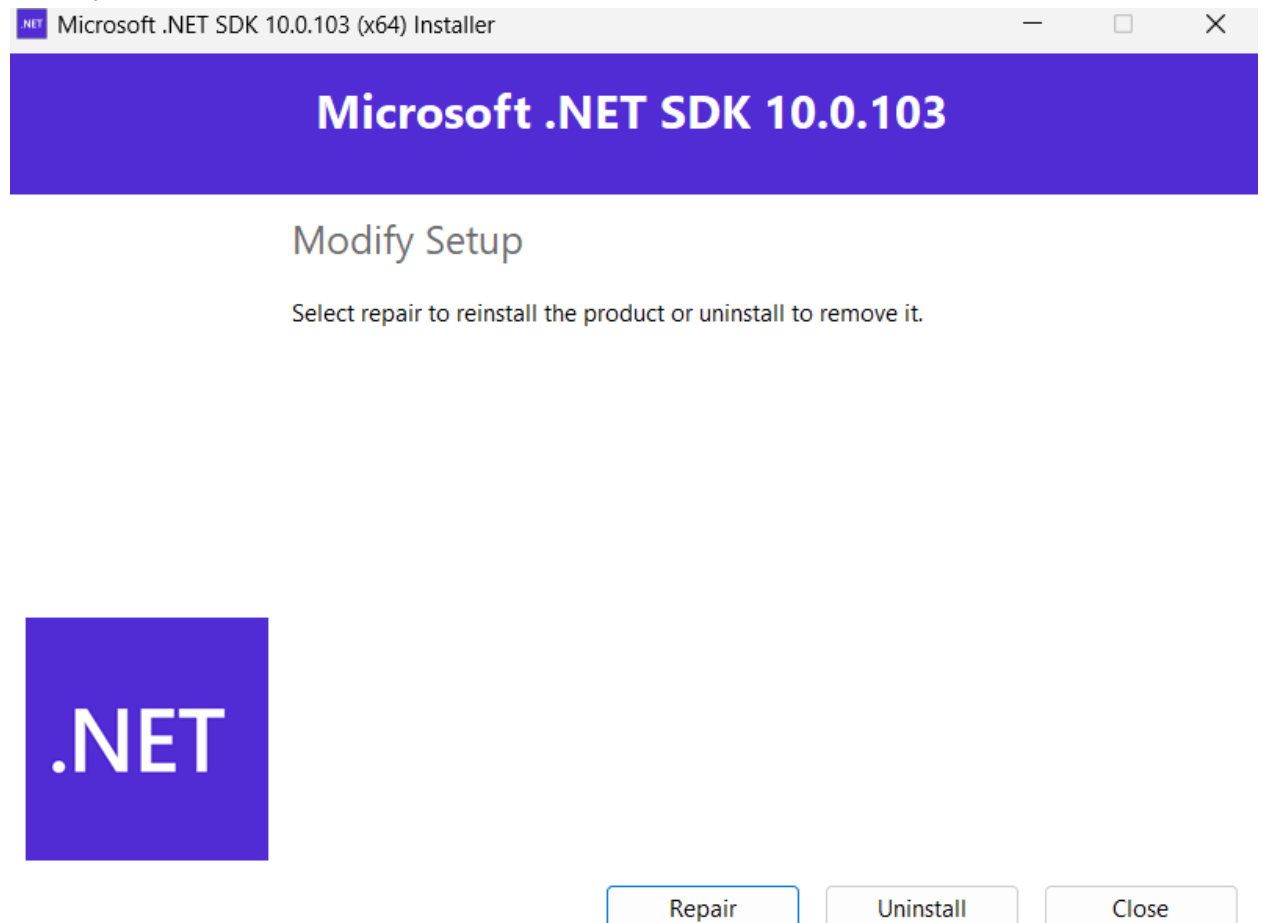

Instructions for Lab 1

The purpose of this lab is to install dotnet and build a Hello World web application using ASP.NET

Step 1: Install dotnet

1. Review the course material and install dotnet SDK.

Having reviewed the course materials in the previous lecture, I installed the dotnet SDK from this link <https://dotnet.microsoft.com/en-us/download>

2. Verify that *dotnet* is installed by running the command *dotnet --version* from your command line.

```
C:\Users\Emma>cmd
Microsoft Windows [Version 10.0.26200.7840]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Emma>dotnet --version
10.0.103
```

Step 2: Build a Hello World web application using ASP.NET

1. Open your terminal
2. Run the following commands

dotnet new web -n AspNetHelloWorld

```
C:\Users\Emma>dotnet new web -n AspNetHelloWorld

Welcome to .NET 10.0!
-----
SDK Version: 10.0.103

Telemetry
-----
The .NET tools collect usage data in order to help us improve your experience. It is collected by Microsoft and shared with the community. You can opt-out of telemetry by setting the DOTNET_CLI_TELEMETRY_OPTOUT environment variable to '1' or 'true' using your favorite shell.

Read more about .NET CLI Tools telemetry: https://aka.ms/dotnet-cli-telemetry

-----
Installed an ASP.NET Core HTTPS development certificate.
To trust the certificate, run 'dotnet dev-certs https --trust'
Learn about HTTPS: https://aka.ms/dotnet-https

-----
Write your first app: https://aka.ms/dotnet-hello-world

Report issues and find source on GitHub: https://github.com/dotnet/core
Use 'dotnet --help' to see available commands or visit: https://aka.ms/dotnet-cli
-----
The template "ASP.NET Core Empty" was created successfully.

Processing post-creation actions...
Restoring C:\Users\Emma\AspNetHelloWorld\AspNetHelloWorld.csproj:
Restore succeeded.
```

cd AspNetHelloWorld

```
C:\Users\Emma>cd AspNetHelloWorld

C:\Users\Emma\AspNetHelloWorld>do
```

dotnet run

```
C:\Users\Emma\AspNetHelloWorld>dotnet run
Using launch settings from C:\Users\Emma\AspNetHelloWorld\Properties\launchSettings.json...
Building...

      Hosting environment: Development
info: Microsoft.Hosting.Lifetime[0]
      Content root path: C:\Users\Emma\AspNetHelloWorld
```

3. Follow the instruction and open the Hello World webapp (its looks like

<http://localhost:5150>) – After running the application on my terminal, I copied the host link to the chrome web browser for the webapp display.
